

Fabric Structures II

Bigger Shapes, Smaller Shipping

exhibiting solutions

Big Bold Graphic Shapes: Fabric Structures II

Big Look, Small Shipping

Skyline Fabric Structures II create large, organic graphic shapes that get attention from all over the show floor, yet pack flat without welded corners and in sections for lower shipping and drayage costs.

Integral To Skyline Systems

Engineered to work seamlessly with other Skyline exhibit systems, Fabric Structures II can be an accent to your exhibit, or can become the central part of your exhibit design solution.

Easy To Install

Aluminum 2" diameter frame sections connect quickly without tools. Finished structures can attach to the show hall ceiling, or directly to your supporting exhibit structure to save money on riggers.

One Source, Better Look

Skyline builds both the graphics and the structure together – so fit and finish is assured. You get the best look possible.

Fabric Structures II adds towering mass above your largest island exhibit designs.

Note: Ceiling-mounting cables not shown.

Modular Flexibility

Flexibility Expands Choices

Fabric Structures II shapes can adapt into new configurations for multiple booth sizes, and even be reused later in new shapes or with new graphics, because it has no welded corners or joints along with connectors that can join at 48 different angles. That higher level of flexibility gives you more from your exhibiting budget.

Connect to Other Systems

Create a design matched to your specific needs by connecting Skyline Fabric Structures II with Skyline Tube System, SkyTruss® and more.

CUSTOM CARBON

Custom Solutions That Set You Apart

The Right People Right On Time

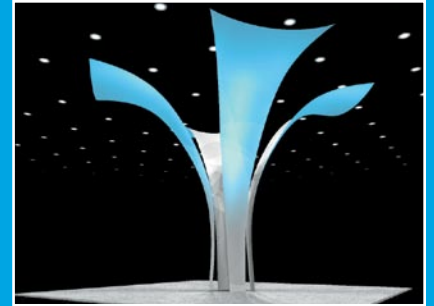

The Right

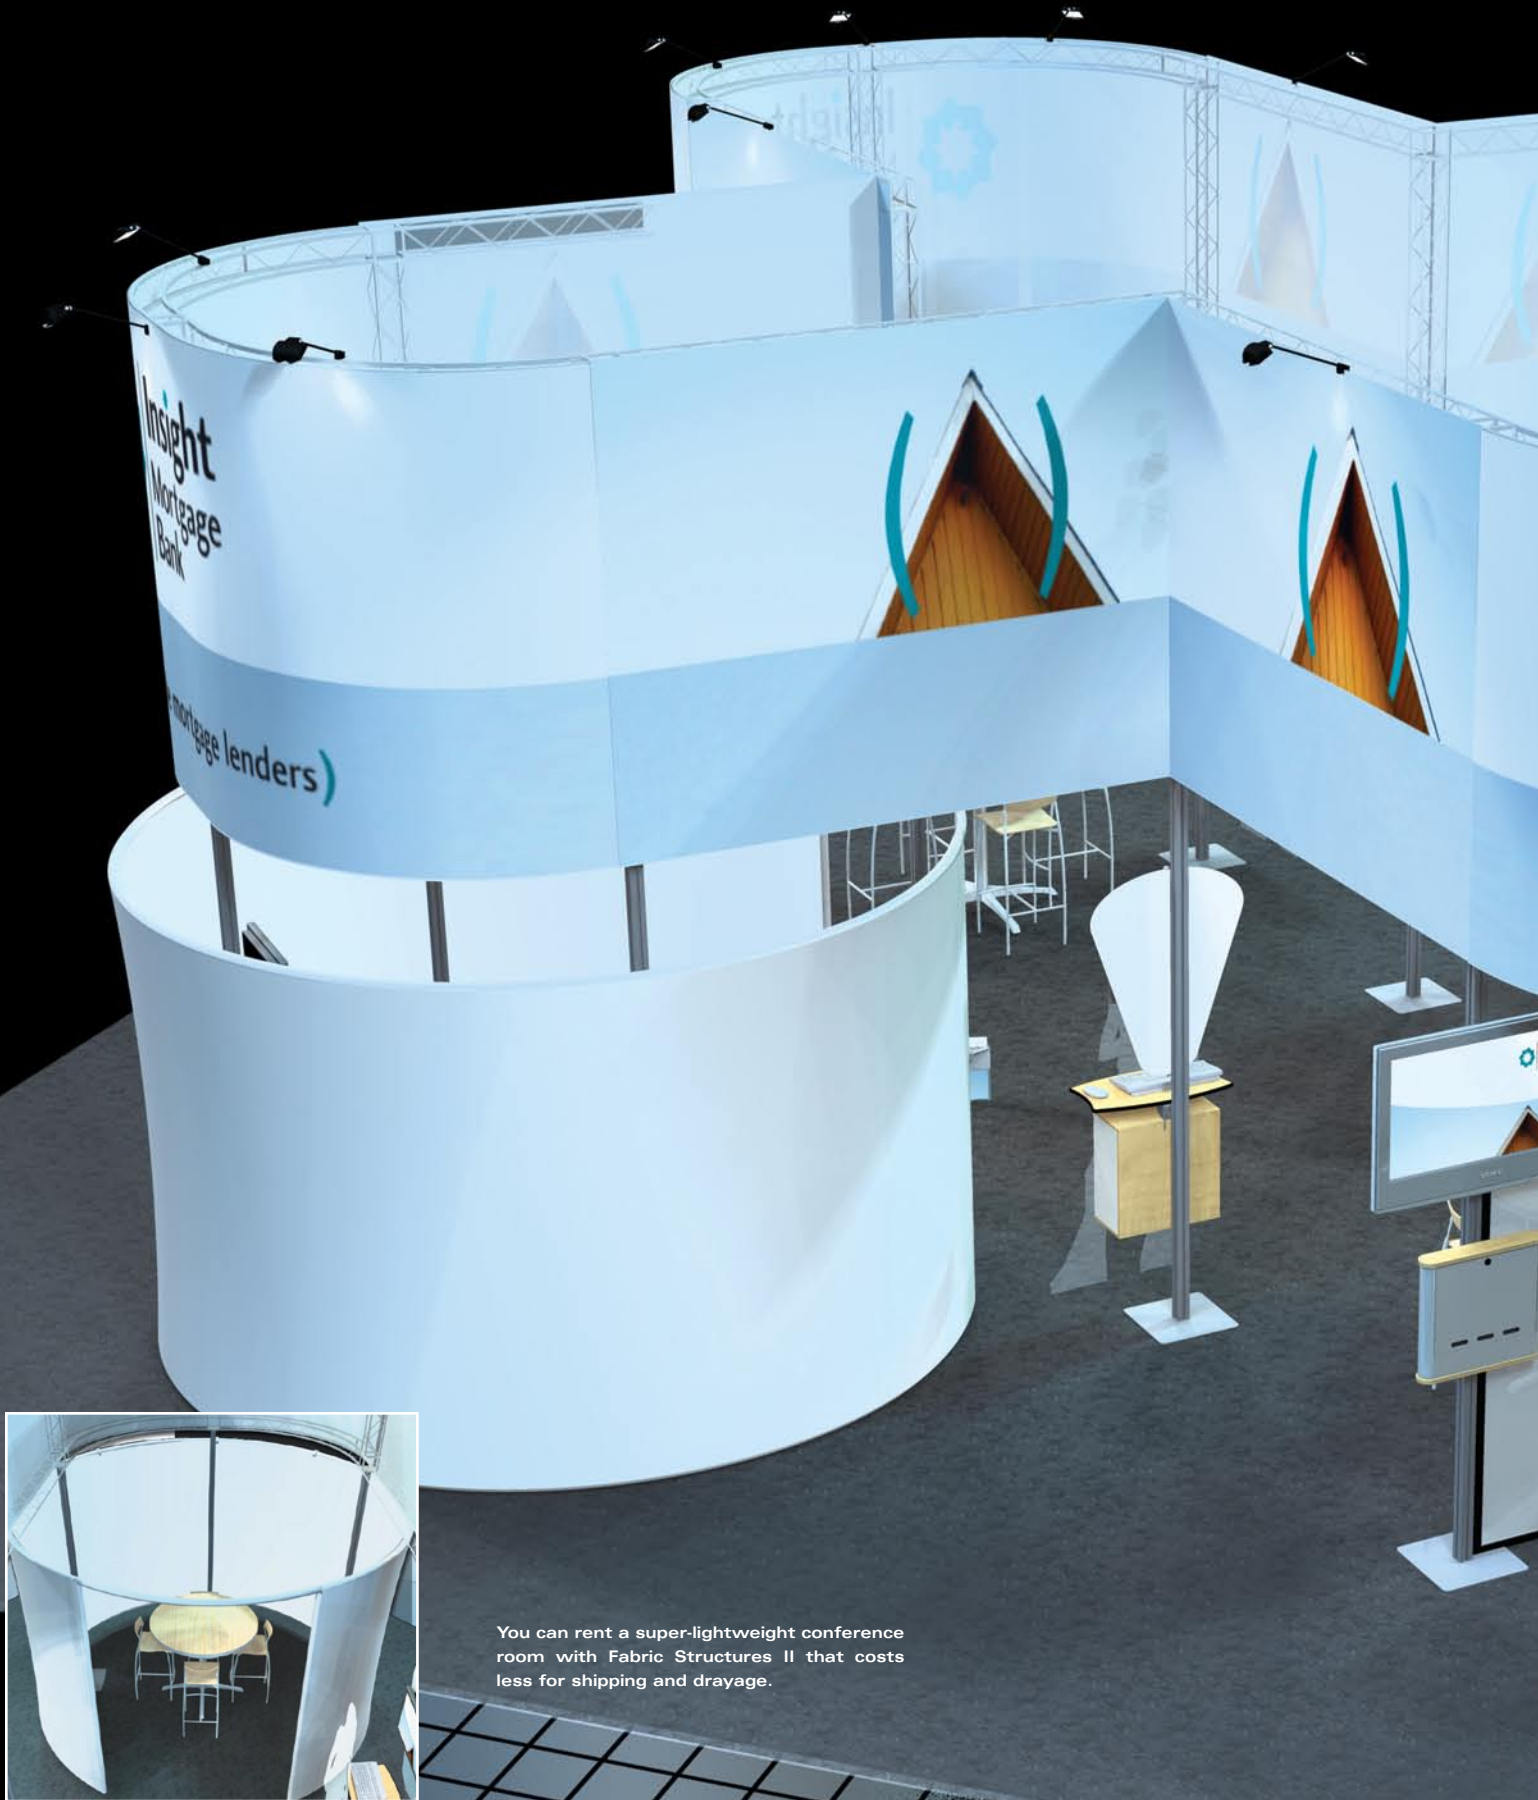

The Right People Right O

Skyline Fabric Structures II has been engineered for maximum off-the-shelf customization. By varying the length, angle, and shape of the frame, we can create custom graphic shapes that give you a unique look that stands apart from the rest.

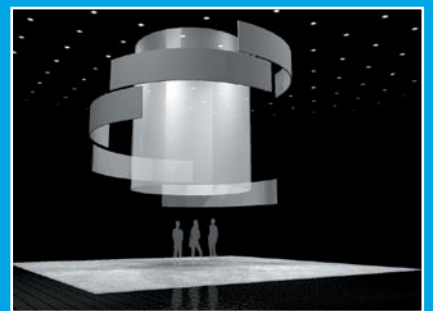

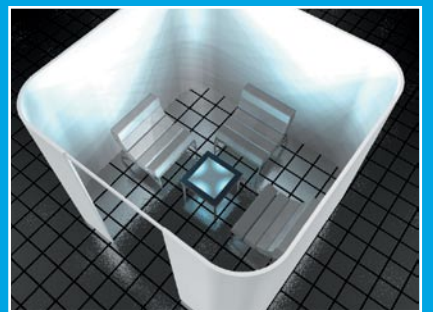

Rental Adds Flexibility, Lowers Cost

You can rent a super-lightweight conference room with Fabric Structures II that costs less for shipping and drayage.

Just because you want a big exhibit doesn't mean you want it forever. You can rent several popular Skyline Fabric Structures II shapes, such as conference rooms, walls, or hanging structures. Rental includes the entire structure and a white or black cover. You can further customize them with attached graphics, or colored lights. Or, you can purchase a cover with your own custom graphics.

Why Our Structures are Better Skyline Quality

Skyline Fabric Structures are designed with your exhibiting experience in mind. They are engineered for easy installation, to look better and are built to last.

Painted Frames

Painted frames keep fabric clean! Unfinished metal frames leave residue on hands and fabric.

Stretch-Knit Fabric Cover

Stretch-knit fabric provides a superior look! Graphics are held taut for a better fit and finish.

Vibrant Dye-Sub Graphics

Skyline digital graphics are crisp, brilliant and durable.

Optional Opaque Inner Liner

While most designs will require no liner, there may be times, depending on venue, lighting and application, when greater opacity is desired. Optional opaque liners, layered between graphic cover and backing, are available.

Universal Hanging System

Allows for structures to be rigged from venue ceiling or from structural Skyline systems.

Rotating Motor Compatible

Attract attention! Motor works with ceiling or tower installation.

Care Kit Included

Includes gloves for handling fabric and a throw cloth to cover dirty floors during installation and repacking.

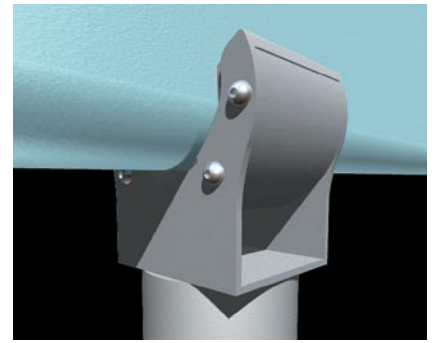

Protective Nylon Cases

Case options include an 8-foot soft-sided shipping case (right)

Accessories

Universal Connection System

Fabric Structure II connectors allow for seamless integration with other Skyline systems. They install without tools and are low-profile for smoother looking graphic covers.

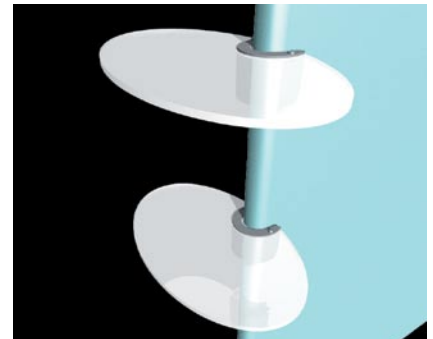

Cable-Mounted Graphics

Fabric Structure II supports cable-mounted graphics that can easily be changed to tailor your message to your audience.

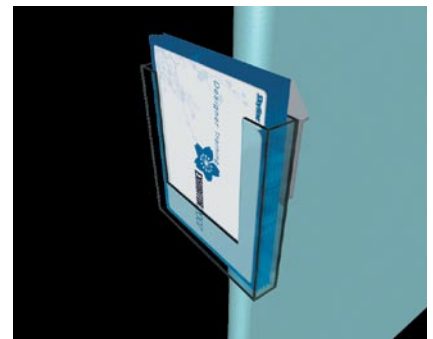

Stylish Product Shelving

Frosted oval shelves display product with style and are easily repositioned to fit your needs.

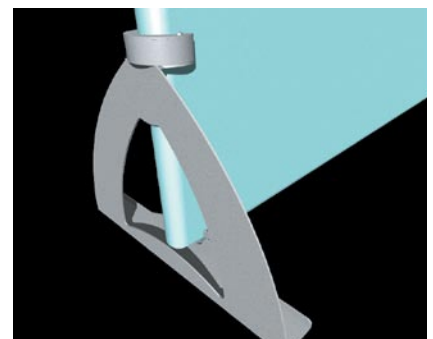

Literature Holders

Literature holders make your company information accessible and are repositionable.

Stabilizer Feet

Provides additional stability for free-standing designs with a flat or slim profile.

with wheels and handles or a soft-sided protective case for use within larger crates carrying additional exhibit assets.

Standard Models: Popular Shapes Outside of Custom Designs

While some popular shapes have become standard models, Fabric Structures II is all about custom design. It's so flexible we can produce nearly any design imaginable. Even the standard models below can be adapted to various designs and sizes to fit your specific needs.

24' Gravity Ring
Diameter: 24'
Height: 69"

32' Gravity Ring
Diameter: 32'
Height: 69"

16' Disk
Diameter: 16' (192")

Round Conference Room
Diameter: 145"
Height: 90"

Square Conference Room
Length/Width: 145" x 145"
Height: 90"

Conic Wall
Width: 74" (top) x 140" (bottom)
Height: 113.5"

90° Low Curved Wall
Length: 266"
Height: 47.6"

Tapered Wall
Length: 205"
Height: 55" to 94"
