

# PictureScape™

Versatile Frame & Fabric Exhibit System

# Stand Out With Custom Shapes

## PictureScape™

### Step Outside of Square!

PictureScape™ allows for angled frame sections so you can create a look that complements your graphics and supports your brand. Create nearly any angular shape imaginable.

### FlexLock™ Fabric Connection

Skyline's proprietary fabric connection system is concealed for a clean, professional look and allows for easy installation.

### Double-Sided Graphics

PictureScape can carry graphics on both sides making it perfect for stand-alone kiosks in lobbies, retail settings or trade shows. And, PictureScape hides wires between graphics.

### Protective Shipping Case

Most 10' PictureScape displays, including lights and accessories, will fit in a single, soft-sided case with handles and wheels for easy transport.

## More Than Ever, Your Exhibit Is Your Brand!

Beyond your graphics, your exhibit architecture can now be a big part of your brand presentation – even in 10' and 20' (3m x 6m) spaces.

Make a statement with bold shapes that make an impression and say more about your brand.

## PictureScape™ – Affordable Exhibiting Solutions

PictureScape is smartly designed to provide a big look with a system that is streamlined and lightweight. Its sleek aluminum frame and fabric graphics reduce operating costs like storage, shipping and drayage.

### Simple, One-Tool Installation

PictureScape's frame assembles quickly with a simple Allen wrench.

### Flexible to Fit Varying Spaces

Frame sections can be reconfigured to fit different booth sizes. Use sections of your larger exhibit to fit smaller spaces or add on to your smaller exhibit as you grow.

### Available for Rent

Exhibit infrequently? Rent your exhibit hardware now and leave future design possibilities open. Or rent additional components for a larger presence at your major show.

Custom shapes, and the use of positive and negative space, can create interesting areas without adding significant bulk and weight. Visually, PictureScape works with SkyTruss® structures (above) and other Skyline custom modular systems.

### Maximum Graphic Impact

Capture attention with graphics and shape. PictureScape's design allows your message to stand out.

### Overlapping Layers Create a Dynamic Brand Presentation

With PictureScape's slim profile, you can create interest using depth and lighting in conjunction with your graphics and still have ample room for booth staff interaction and functional workstations.
